

## LANDING PAGE

The landing page allows the teacher or the admin to quickly get crucial information for their classes. We have two variations of the landing page, first for the teacher and second for the admin. Both have been explained below.

### Landing Page – Teachers

Strengths :

1. Knowing single digit addition facts (Class :3-A)  
2. Adding 3 numbers (total up to 10) (Class :3-A)  
3. Adding two 2-digit numbers (without regrouping) (Class :3-A)

Weaknesses :

1. Upper and Lower Bounds (Class : 3-A)

Strengths and Weaknesses

Announcements

**New Parent Portal Feature**  
Teachers can now directly mail parents if parent email ids are mapped to the student's account.  
[Click to know more or disallow this.](#)  
◦ You have received 23 new Kudos!  
You can now prioritize activated topics to communicate to students to take up in that order.  
New learning unit added for classes 6,7: Understanding and using the exterior angle property of a triangle  
Congrats! Sarangi Kotadia of 3A won SparkieChamp

8

Total : 57

Activities attempted

Missed Sessions (1/1)

• School missed sessions of class 3A

Alerts

The page first gives the teacher strengths and weaknesses in her classes. Here, we can see, that Upper and Lower Bounds needs to be addressed in Class 3A.

Strengths :

1. Knowing single digit addition facts (Class :3-A)  
2. Adding 3 numbers (total up to 10) (Class :3-A)  
3. Adding two 2-digit numbers (without regrouping) (Class :3-A)

Weaknesses :

1. Upper and Lower Bounds (Class : 3-A)

Strengths and Weaknesses

Next, the page shares announcements and good news with teachers.

### New Parent Portal Feature

Teachers can now directly mail parents if parent email ids are mapped to the student's account.

[Click to know more or disallow this.](#)

Congrats! Samarth Johri of 6B was awarded AQAD explanation of the day.

Announcements

We have also added the Mindspark in Numbers section here.

This is followed up with important alerts, on missed sessions, low topic progress, too many active topics, etc.

### Missed Sessions (1/1)

- School missed sessions of class 3A

Alerts

## Landing Page – Admin

This is what the admin page looks like –

Classes with good accuracy :

No data available with accuracy higher than 80%.

Classes with low accuracy :

[6-C](#)
[6-B](#)
[6-A](#)

Classes with good usage :

No data available.

Classes with low usage :

[5-D](#)
[5-A](#)
[4-D](#)

Strengths and Weaknesses

5 teachers did not log in once in the past week. Please encourage them to log into Mindspark more often.

On an average teachers spent **24 minutes** on Mindspark in the past week. We recommend that teachers spend atleast **1 hour** on Mindspark in a week.

See more details [here](#).

Teacher Usage

Announcements

### New Parent Portal Feature

Teachers can now directly mail parents if parent email ids are mapped to the student's account.

[Click to know more or disallow this.](#)

You can now prioritize activated topics to communicate to students to take up in that order.

New learning unit added for classes 6,7: Understanding and using the exterior angle property of a triangle

Total : 0

Higher Level reached

### Too Many Active Topics

- 9 Topics activated in class 5A

Alerts

For the admins, we wanted to share only the critical pieces of information that they could act upon. There is a button for Class Reports, which allows the teacher to quickly navigate to it.

The first section allows the teacher to quickly see the classes which have good/low accuracy and good/low usage.

Dashboard - Mindspark in your classes from 09<sup>th</sup> May to 16<sup>th</sup> May.

Class Reports

Classes with good accuracy : [5-C](#) [6-C](#) [6-D](#)

Classes with low accuracy : No topics found with accuracy lower than 30%.

Classes with good usage : No class has done Mindspark for over 2 hours.

Classes with low usage : [5-B](#) [6-A](#) [5-D](#)

5 teachers did not log into Mindspark in the past week. Please encourage them to log in more often.

On an average teachers spent 04 minute(s) on Mindspark in the past week. We recommend that they spend atleast 1 hour on Mindspark in a week.

See more details [here](#).

We have also added a section for Teacher Usage, as admins are concerned about how their teachers are doing. The section allows you to see the number of teachers who have not logged in the past week, and see the average usage of teachers.

5 teachers did not log in once in the past week. Please encourage them to log into Mindspark more often.

On an average teachers spent 24 minutes on Mindspark in the past week. We recommend that teachers spend atleast 1 hour on Mindspark in a week.
